

WHAT IS CLAIMED IS:

1.A glue tape cutter, comprising

a cutting table with two opposite lateral covers;

a press plate, being disposed at the bottom of the cutting table;

5 at least a holding blade, being fixed to the cutting table above
the press plate;

a cutting base, being rotationally attached to the cutting table;

a knife blade, being attached to an upper part of the cutting
base; and

10 a shaft, being disposed at a lower part of the cutting base and
both ends thereof being attached to the lateral covers of the cutting
table respectively

whereby, once the cutting base rotates, the glue tape can produce
an adhered reversed fold.

15 2. The glue tape cutter as defined in claim 1, wherein the shaft
extends outward from one of the lateral covers to engage with a stir
lever.

3. The glue tape cutter as defined in claim 2, wherein a spring
piece is mounted in the press base to keep the press base in place.
